Education

FEU Institute of Technology
Bachelor of Science in Information Technology

Expected September 2026
First Runner Up, Capstone Project Competition

Experience

IBM Philippines
Application Developer Associate Intern

May 2026 – Aug 2026
Technohub

- Completed structured training in Java (Jakarta EE), Vue.js, and mobile application development, building hands-on experience with modern full-stack frameworks.
- Immersed in IBM's corporate culture, collaborating in team projects, learning agile methodologies, and understanding enterprise software development best practices.
- Trained in VBA and contributed to a team project that automated Excel workflows using Excel VBA macros, reducing manual data processing tasks.

Simplevia Technologies
Backend Developer Intern

Jan 2026 – March 2026
Makati City

- Designed and implemented an SLA-driven ticketing system with automated escalation workflows and lifecycle state modeling.
- Developed RESTful APIs for ticket creation and assignment while designing ERDs with normalized MySQL tables.
- Collaborated with stakeholders to translate complex business requirements into production-ready backend system designs.

Projects

Stelio Property Renting | *React.js, Typescript, Spring boot, PostgreSQL, Stripe, Cloudflare R2, Digital Ocean*

- Built a transaction-safe rental platform using Spring Boot and PostgreSQL, implementing pessimistic locking, TTL-based reservations, and idempotent APIs to prevent double booking under concurrent requests.
- Designed a Stripe-integrated payment system with PaymentIntents, idempotency keys, and webhook-driven state transitions to ensure secure, consistent, and duplicate-safe transactions.
- Deployed and secured a full-stack production system using Cloudflare Pages and DigitalOcean Droplet with TLS/SSH, enabling real-time updates via WebSocket, JWT-based RBAC, and scalable file storage via Cloudflare R2.

Mio Learning Management System with Specialized Activities | *React native, Laravel, Firebase, Firebase Storage*

- Developed a cross-platform web and mobile LMS using React Native and TypeScript, integrating RNN-based Automatic Speech Recognition for specialized auditory learning.
- Built secure RESTful APIs with Laravel and utilized Firebase Realtime Database and Storage to manage data, media, and automated remedial learning paths for struggling students.
- Created analytics dashboards to track overall student performance, engagement, and progress, providing actionable insights for educators.

Technical Skills

Languages: JavaScript, Typescript, Java, Python, SQL

Frontend: React (TypeScript), React Native, Vue.js, Tailwind CSS, HTML5, CSS3

Backend: Spring Boot, Flask, Node.js, Express.js, FastAPI, REST APIs, JWT

Databases & Storage: PostgreSQL, MySQL, MongoDB, Firebase, Cloudflare R2

Concepts: Transactions, Concurrency Control, Idempotency, RBAC, SLA-driven Workflows

Tools: Git, GitHub, Postman, Digital Ocean, Stripe, MongoDB, Firebase, Cloudflare R2
