PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer experienced in building transactional systems and RESTful APIs using Spring Boot, Flask, and MySQL. Strong foundation in system design, relational database modeling, concurrency control, and secure authentication. Focused on developing scalable and production-ready backend architectures.

TECHNICAL SKILLS

Frontend: React (TypeScript), HTML5, CSS3, Tailwind

Backend: Spring Boot, Flask, Node.js, REST APIs, JWT, OAuth2

Database: MySQL, PostgreSQL, Cloudflare R2, MongoDB, ERD Design, Normalization, Firebase

Concepts: Transactions, Concurrency Control, Idempotency, RBAC, SLA-based Workflows

Tools: Git, GitHub, Postman, Digital Ocean

EXPERIENCE

Backend Developer (Internship) | Simplevia Technologies Inc. | Jan 2026 – March 2026

- Designed and implemented an SLA-driven ticketing system with automated escalation workflows and lifecycle state modeling.
- Developed RESTful APIs for ticket creation and assignment while designing ERDs with normalized MySQL tables.
- Collaborated with stakeholders to translate complex business requirements into production-ready backend system designs.

PROJECTS

Real Estate & Rental Web Application | Full Stack Developer | Sep 2025 – Present

- Engineered a transactional rental platform using Spring Boot and PostgreSQL, migrated to a high-performance React + TypeScript + Vite frontend.
- Implemented atomic booking transactions and idempotent REST APIs with Idempotency Keys to prevent double-booking and duplicate charges.
- Designed a TTL-based reservation system with row-level locking to automatically release stale bookings and resolve race conditions.

Mio – Web and Mobile Oralism-Based LMS | Full Stack Developer | Sep 2024 – July 2025

- Developed a cross-platform mobile learning application using React Native and TypeScript for the Philippine Institute for the Deaf.
- Built and integrated secure RESTful APIs using Laravel, and implemented Firebase Realtime Database and Firebase Storage for data handling and media management.
- Integrated RNN-based Automatic Speech Recognition to support specialized speech and auditory learning features.

EDUCATION

**Bachelor of Science in Information Technology
with Specialization in Web and Mobile Application**
FEU Institute of Technology

2022 - Present
